

## ASTRA DF 2304

---

Silicone defoamer

### Description

ASTRA DF 2304 is an organo-silicone emulsion. It is used as a defoamer for water-borne systems. It has good antifoam ability even at low dosage. This defoamer is easy to disperse, it has low possibility to cause craters. This defoamer is suitable for pigmented and clear systems.

### Physical and Chemical properties

**Ingredient:** Polyether-modified polysiloxane

**Appearance:** White emulsion

**Content:** 20%

**Solvent:** Water

### Speciality

1. ASTRA DF 2304 defoamer is suitable for different water-borne coating systems.
2. ASTRA DF 2304 has good antifoam ability even at low dosage.
3. ASTRA DF 2304 has low possibility to cause craters.

### Application System and Dosage

ASTRA DF 2304 is recommended to use in different water-borne coating systems.

Usually, it should be charged at the dispersion stage during the manufacture with 0.05% to 1.0% dosage upon total formulation.

### Package

**25kg** metal pail.
