

## ASTRA DF 2704

Silicone defoamer

### Description

ASTRA DF 2704 is a concentrated silicone antifoam agent that could be diluted. It could achieve long-lasting antifoam performance even at low dosage.

### Physical and Chemical properties

**Ingredient:** Modified polysiloxane, polyether polyol and silicone

**Appearance:** Milky white viscous liquid

**Active part:** 100%

**Viscosity:** 500-1000 mPa\*s

### Speciality

1. ASTRA DF 2704 not contain hazardous substances and does not contain NP, APEO.
2. ASTRA DF 2704 could be mixed with other silicone emulsions.
3. ASTRA DF 2704 could be diluted with thickening water. In the process of dilution, the speed of stirring is between 30 to 60 rpm and the time of stirring is recommended for no more than 10 minutes.

### Application System and Dosage

ASTRA DF 2704 is recommended for sewage treatment, industrial cleaning systems and adhesives, paints and inks. This product is a mixture. Layering during shelf life may occur, stir well before usage at 30 to 60 rpm. It will not affect the performance of the product.

The recommended dosage of the additive is 0.1% to 1.0% upon total formulation. Defoamer should be introduced at sufficient shear forces. The optimum dosage should be preliminarily tested in a laboratory setting.

### Package

25kg metal pail.
