

ASTRA DF 2804

Silicone defoamer

Description

ASTRA DF 2804 defoamer is an organically modified polysiloxane defoamer. Recommended application industries are water-based wood paint and water-based industrial paint industries.

Physical and Chemical properties

Ingredient: Organomodified polysiloxane

Appearance: Colorless to gray uniform liquid

Active part: 100%

Viscosity: 30-300 mPa*s

Speciality

1. Recommended application industries are water-based wood paint and water-based industrial paint industries.
2. This product does not contain hazardous substances and does not contain NP, APEO.

Application System and Dosage

The recommended dosage of the additive is 0.1% to 1.0% upon total formulation. This product should be introduced at the dispersion stage for proper defoamer distribution.

ASTRA DF 2804 can not be diluted with water.

Package

25kg metal pail.
