

## ASTRA DISP 206

---

Dispersant

### Description

ASTRA DISP 206 is a dispersant that was specially designed for putties. It has excellent wetting ability of inorganic pigments and could decrease the viscosity of the system.

### Physical and Chemical properties

**Ingredient:** Polymer compound with pigment affinity groups

**Appearance:** Yellow transparent liquid

**Active part:** 50%

**Solvent:** Ethylene glycol diacetate

### Specialty

- 1.ASTRA DISP 206 is suitable for medium-polarity systems and has excellent compatibility with most of common resins.
- 2.ASTRA DISP 206 could decrease the viscosity in the millbase and increase the pigment content in the pigment paste.

### Application System and Dosage

ASTRA DISP 206 is suitable for solvent-borne coating systems.

Usually, it is recommended to introduce the additive before the dispersion stage during the manufacture with 1% to 2% dosage upon inorganic pigments and with 5% to 20% dosage upon bentonite.

### Package

25kg plastic pail.
