

ASTRA LA 1505NS

Non-silicone leveling agent

Description

ASTRA LA 1505NS is a fluorocarbon modified acrylic copolymer used as a leveling agent with high fluorine content. It has excellent leveling performance, high leveling speed and good compatibility with most of common resins. ASTRA LA 1505NS could greatly decrease the surface tension and provide anti-crater performance.

Physical and Chemical properties

Ingredient: Fluorinated acrylic copolymer

Appearance: Colorless transparent liquid

Active part: 100%

Specialty

1. ASTRA LA 1505NS has good compatibility with resins, provides leveling in solvent-borne systems.
2. ASTRA LA 1505NS could greatly decrease the surface tension of the system and improve the substrate wetting.

Application System and Dosage

ASTRA LA 1505NS is recommended for solvent-borne and solvent-free systems such as alkyd, acrylic acid, amino baking systems.

The recommended dosage of the additive is around 0.1% to 1% upon total formulation. It could be introduced at a random stage during the manufacture.

Package

25kg metal pail.
