

ASTRA LA 3701

Leveling agent

Description

ASTRA LA 3701 is a special modified polysiloxane with acrylic groups. It is suitable for UV curable coating systems, it could participate in crosslinking. Because of a special chemical structure the polysiloxane chain could stay at the surface of the coating and provide excellent anti-blocking and anti-graffiti properties.

Physical and Chemical properties

Ingredient: Modified polysiloxane
Appearance: Opaque yellow liquid
Active part: 100%

Speciality

1. ASTRA LA 3701 could decrease the surface tension of the system and accelerate wetting of the substrate.
2. ASTRA LA 3701 could provide outstanding anti-blocking and anti-graffiti properties.

Application System and Dosage

ASTRA LA 3701 is recommended for UV curable coatings.

The recommended dosage of the additive is 0.1 - 1% upon total formulation.

Package

25kg metal pail.
