

ASTRA LA 3901

Leveling agent

Description

ASTRA LA 3901 is a modified polysiloxane with acrylic double bond, which has excellent compatibility with most of common resins. It provides good leveling and anti-graffiti effect. It is particularly suitable for UV curable systems, and also applicable for water-borne and solvent-borne paints to provide permanent hand feel.

Physical and Chemical properties

Ingredient: Polyether modified polysiloxane with acrylate groups

Appearance: Yellow transparent liquid

Active part: 50%

Solvent: Tripropylene glycol diacrylate

Speciality

Leveling	Wetting	Recoatibility	Compatibility	Sliding	Low Foam Stabilization	Anti-craters	Anti-blocking
