

## ASTRA LA 905NS

---

Non-silicone leveling agent

### Description

ASTRA LA 905NS is a modified acrylic copolymer which is used in baking paint systems to improve leveling and provide foam-control properties.

### Physical and Chemical properties

**Ingredient:** Modified acrylic copolymer

**Appearance:** Light yellow transparent solution

**Active part:** 50%

**Solvent:** Naphtha

### Specialty

1. ASTRA LA 905NS has good compatibility and provides good leveling in solvent-borne systems. It could prevent coating defect formation such as shrinkage and fish eyes.
2. ASTRA LA 905NS could provide foam-control properties in baking paint systems.

### Application System and Dosage

ASTRA LA 905NS is suitable for inks and for solvent-borne and solvent-free coating systems such as alkyd and acrylic systems, amino baking paints, polyurethane systems and UV curable systems.

Usually, it is possible to introduce the additive at a random stage during the manufacture with 0.1% to 1% dosage upon total formulation.

### Package

**25kg** metal pail.
