

## ASTRA PA 1208

---

Adhesion promoter

### Description

ASTRA PA 1208 is a branched polyester with active hydrogen atoms used as an adhesion promoter. It is suitable for melamine baking systems, it could enhance the adhesion between the paint film and the metal substrate. ASTRA PA 1208 has good compatibility with melamine resin systems.

### Physical and Chemical properties

**Ingredient:** Special polyester

**Appearance:** Colorless viscous transparent liquid

**Active part:** 75%

**Solvent:** Iso-propanol

### Speciality

1. ASTRA PA 1208 adhesion promoter is used in solvent-borne melamine baking systems to improve the adhesion to the metal substrate.
2. ASTRA PA 1208 is a branched polyester with active hydrogen atom that could rapidly accelerate the adhesion to the substrate.
3. ASTRA PA 1208 has good compatibility with melamine resins.

### Application System and Dosage

ASTRA PA 1208 is recommended to use in melamine baking resins or water-borne coating systems. Usually, it could be introduced at a random stage during the manufacture with 0.1% to 5% dosage upon total formulation.

### Package

**25kg** metal pail.
