

ASTRA REO 13010

Rheology Modifier

Description

ASTRA REO 13010 is a water-borne polymer with hydrophobic groups. It is a rheology modifier with great anti-setting and anti-sagging ability. It has strong rheology and is easy to introduce. ASTRA REO 13010 is suitable for all kinds of water-based systems. The compatibility in clear systems should be checked.

Physical and Chemical properties

Ingredient: Polymer with hydrophobic groups

Appearance: Light yellow transparent liquid

Active part: 50%

Solvent: Water

Specialty

1. ASTRA REO 13010 is applicable for water-borne system. It could rapidly increase the viscosity and provide anti-setting and anti-sagging properties.
2. ASTRA REO 13010 is effective in a wide range of pH.

Application System and Dosage

ASTRA REO 13010 is suitable for all water-based industrial coating systems.

The recommended dosage of the additive depends on the type of the system and usually is 0.5 - 2.0% to prevent settling and 2.0 - 5.0% to prevent sagging. It should be introduced at the last stage of the manufacture.

Package

25kg pail.
