

ASTRA WA 903

Wetting agent

Description

ASTRA WA 903 is a polymer modified fluorochemical surfactant. It could effectively decrease the surface tension of the system and provide excellent substrate wetting and leveling ability.

Physical and Chemical properties

Ingredient: Non-ionic polymeric fluorosurfactant
Appearance: Light yellow liquid (It may turn turbid at low temperatures)
Active part: 100%

Speciality

Leveling	Wetting	Recoatibility	Compatibility	Sliding	Low Foam Stabilization	Anti-craters	Anti-blocking

Application System and Dosage

ASTRA WA 903 is suitable for different types of coating systems such as architectural coating systems, printing inks, flooring systems, water-borne coating systems and radiation curable coatings.

Usually, the recommended dosage of the additive is around 0.1% - 1% upon total formulation. The dosage can vary depending on the application and on the formulation.

Package

25kg metal pail.
